STEEL  
DOORS  
STRUCTURE

## The Key Features

Highly secured with 5 locking points operated with one key.

cross bar lock fork for superior locking across multiple points.

Multilayered and robust door frame.

100% termite proof & moisture proof.

Door viewer to see outside.

Strong steel door & frame with beautiful wood finish and steel finish.

Durable and long lasting.

Maintenance free door.

### High-Quality Burglarproof Lock :

Considering its safe reliability, a new-systle lockset is developed resolving the troubled back at home. The lockset has a unique effect of surface treatment, the door can be opened more comfortably and conveniently.

### Reinforced Side-lock Points :

The thickness door leaf leaves the place for assembly of reinforced sid-lock, so is firmer and more durable.

### Air-bay-type seal :

This kind of air-bay seal can seal the door better, Resists the wearing of door and door frame and enables heat preservation and sound insulation.

### New style invisible hinge :

The doors and their frames are connected with new type of hinges, the opening angle can be adjustable so that the doors can be freely opened, such doors longevity are permanent and the performance of guarding against burglar os more predominant.

### The multilayer door frame :

The door frame is thickened to have functions of sound isolation, thermal insulation and cold protection.

### High-Quality Doorsill :

Made of wholly stainless, the doorsill never rusts even after long-term use therefore makes your door dignified forever.

## TWIN DOORS

Hi-Guard steel doors are now becoming the first choice of all the discerning house owners & institutional buyers.

### ●●● DIVINE

Size (mm) : 2100x960x70  
Size (mm) : 2100x1050x70  
Size (mm) : 2400x960x70  
Size (mm) : 2400x1050x70

The twin doors enhance the ventilation of your beautiful home also offering double protection against burglars and miscreants.

### ●●● SERENE

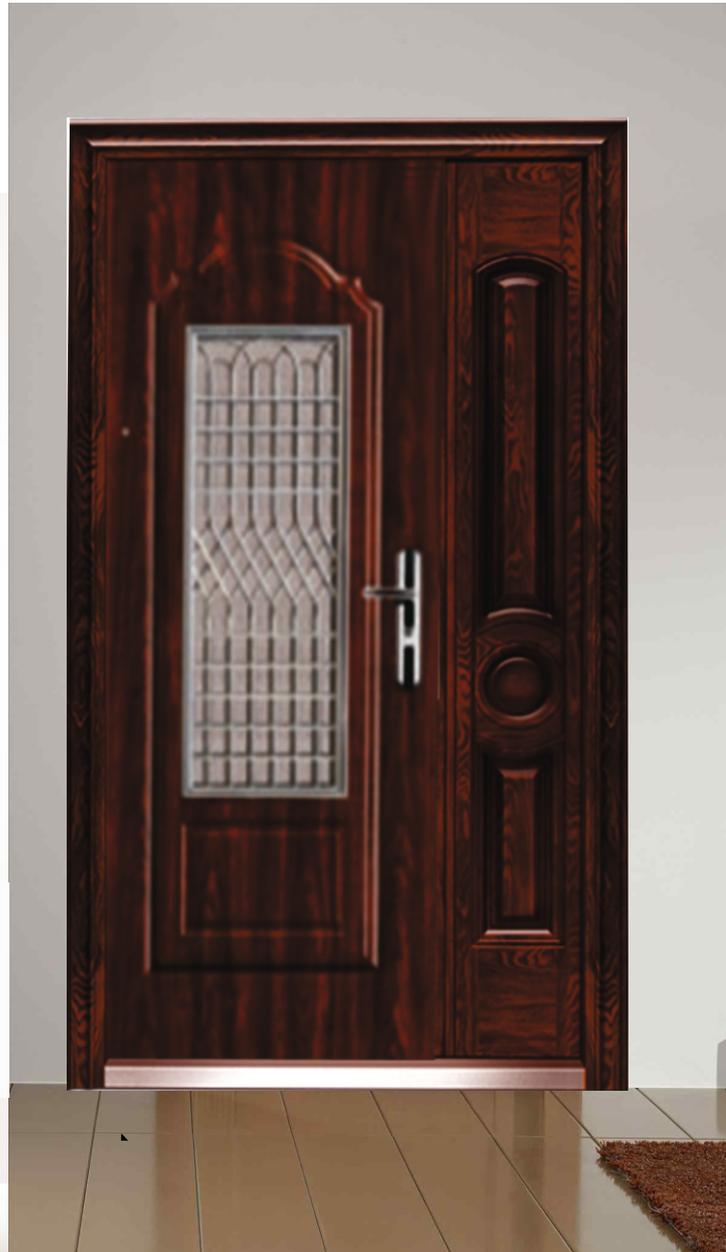

Size (mm) : 2100x960x70  
: 2100x1050x70

Steel outperforms wood and fiber glass in demanding environments. Even when those other material use special cores or other techniques, they are still unable to match the security, performance & longevity of steel.

●●● MANCHESTOR

Size (mm) : 2100x1200x70  
Size (mm) : 2400x1200x70

●●● MANCHESTOR DID

Size (mm) : 2100x1200x70  
Size (mm) : 2400x1200x70

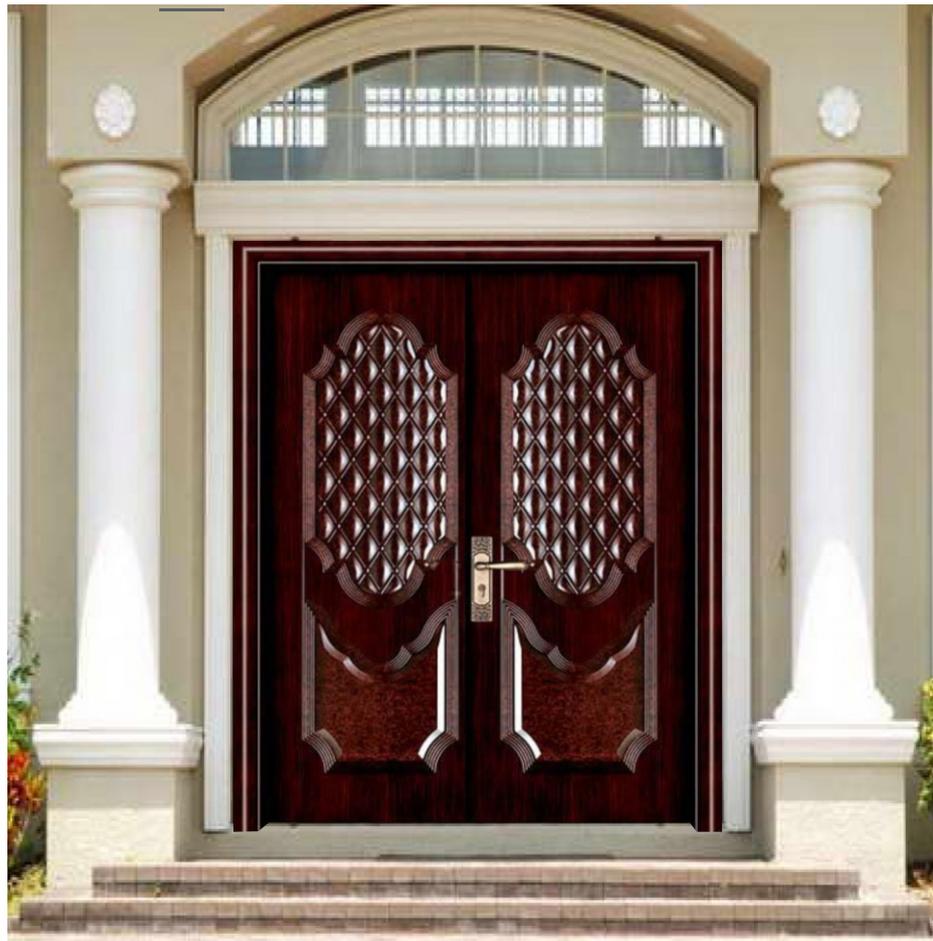

MOTHERSON DOORS

All Hi-Guard steel doors offer stylized embossments which create a beautiful look of your door.

●●● MAHARAJA

Size (mm) : 2100x1500x70

Size (mm) : 2400x1500x70

Since wood absorbs moisture easily, it can peel, bubble, bow, twist & warp resulting in a costly replacement. Hi-Guard steel doors are resistant to all these.

●●● FUSION

Size (mm) : 2100x1200x70

Whether you are looking for a modern stainless steel appearance or a vibrant finish, steel's versatility allows it to satisfy the aesthetic requirements of most projects.

● ● ● RADIANT

Size (mm) : 2100x1500x70

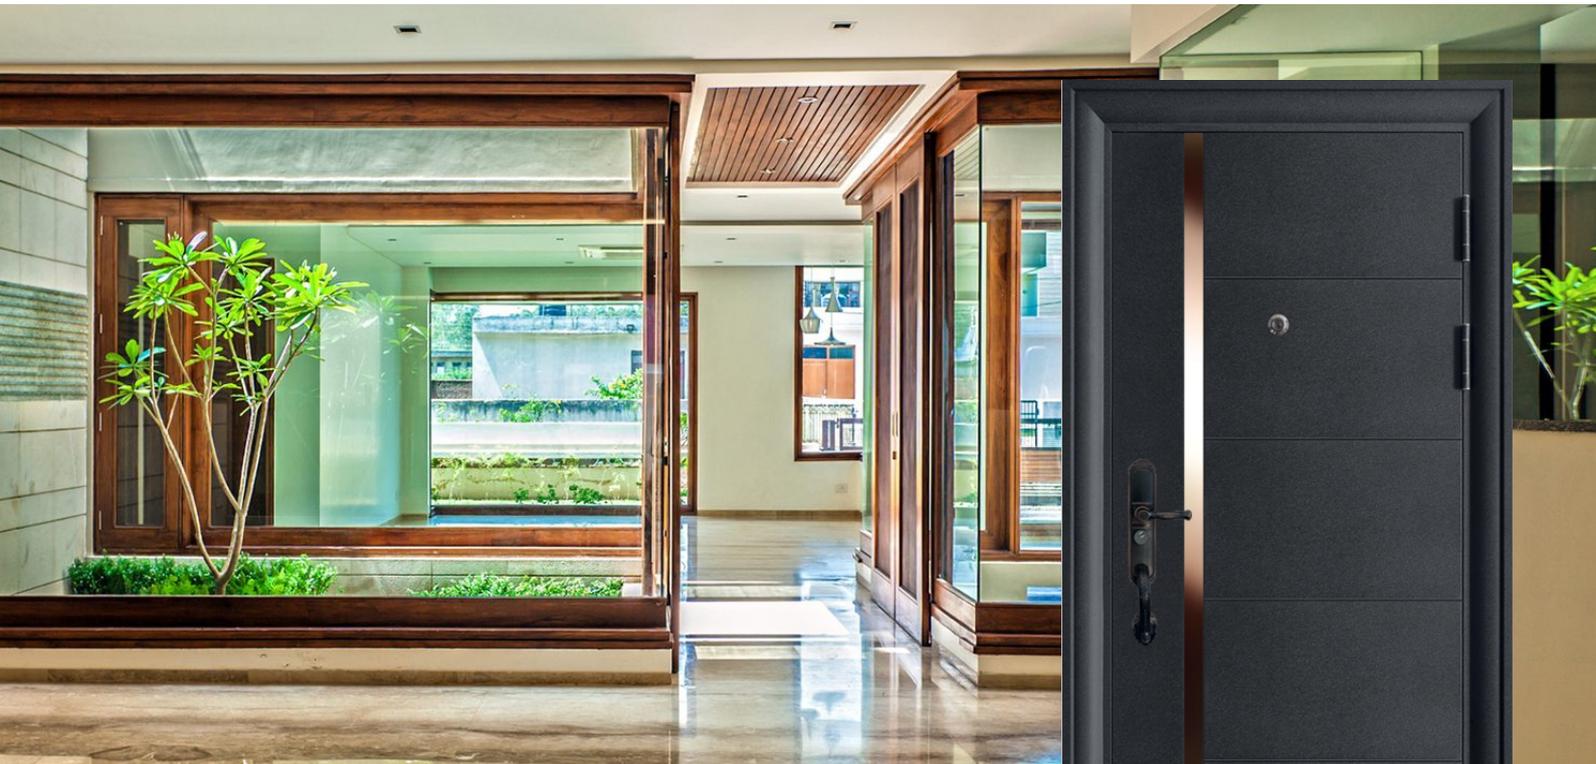

And don't forget all those advantages of performance, longevity & security.

● ● ● SAPHIRE

Size (mm) : 2100x1500x70

Size (mm) : 2400x1500x70

Luxurious home are so called because each & every product used adds to the luxury of that home.

Similar is the range of Hi-Guard Luxury steel doors. Each and every door is made by the best quality raw material using the finest finishes and meticulously crafted.

●●● MARVEL
